

SPECIAL BUILT TRIADS

DIGITAL GRAPHIC PACKAGE

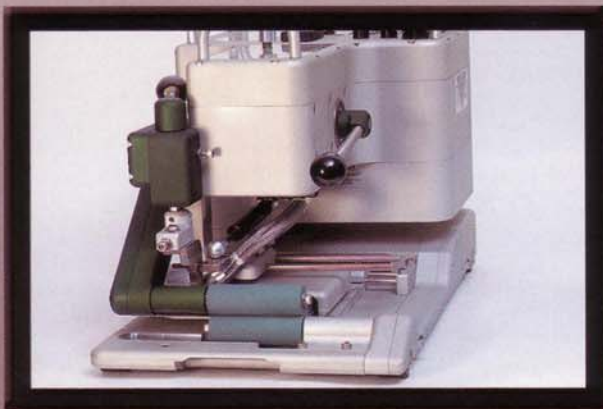

This special *Triad* has been designed around the basic finishing needs of the digital graphics market. This package, based on the 1" (25mm) hem wedge and housing, can provide several welding functions including overlap, flat hem, hem cord and pole pocket welds.

A wide body *Triad* for producing up to a 6" pole pocket hem with a 1"-2" weld width. Great for large diameter pipe insert.

6" POLE POCKET

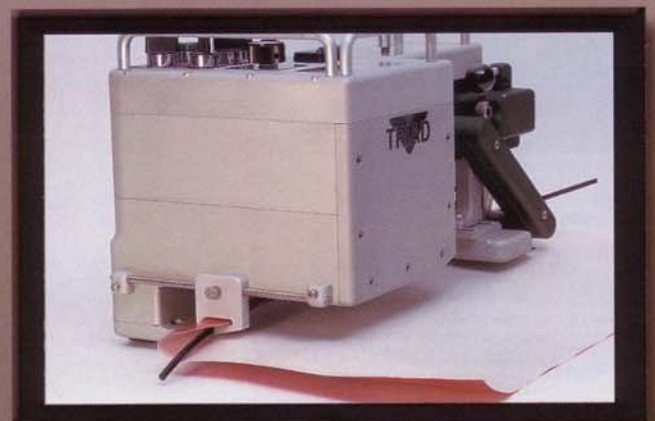

3" OVERLAP

Unit is built with a 3" wedge and rollers to meet your specs. All attachments can be fit on this unit.

DEDICATED HEM

Unit comes with a wider opening for dedicated hem welds, more room to work. No overlap capabilities.
